

Self-driven **Python Engineer** with 2+ years of experience in **backend development** and **Cloud Infrastructure automation**. Proven track record of writing high-quality, maintainable Python code for highly available systems across AWS, Azure, and GCP. Deep expertise in Linux environments (specifically Ubuntu), container orchestration, and building robust web services. Passionate about distributed collaboration, community mentorship, and solving complex problems from first principles.

TECHNICAL SKILLS

- **Backend Development:** Python (Django, Flask, FastAPI), RESTful API Design, PostgreSQL.
- **Cloud & DevOps:** Google Cloud (Compute Engine Basics, Load Balancing), AWS (EC2, S3, API Gateway, CloudWatch), Docker, CI/CD, Linux/Unix CLI, Azure (AKS, Azure Search, Container Apps).
- **Core Concepts:** DNS, VPC, HTTP/S, IP, TLS Networking, Microservices Architecture.
- **Soft Skills:** Technical Training, Root Cause Analysis, Agile Methodologies, Infrastructure as Code (IaC).

Work Experience

Founding Engineer	Victoria Sentinel Kisumu, Kenya	Nov 2024–Feb 2026
• Engineered and deployed a highly-available Python backend (Flask) on AWS (EC2, S3, API Gateway) to facilitate real-time IoT data ingestion and visualization for pilot fish farms. • Implemented scalable architecture and employed Agile development practices to manage the full project lifecycle from concept to production. • Ensured system resilience and performance through rigorous testing and Linux-based server administration.		
Coding Instructor	KidsCodelab Remote and in-person Homabay, Kenya	Nov 2024 – Present
• Mentored learners through gamified project-based programming labs, building confidence in foundational and advanced concepts. • Tailored curriculum updates based on continuous feedback to ensure inclusive and personalized skill progression, showcasing strong learning agility and collaboration skills.		

Projects and Volunteer Experience

AI-Powered Digital Trade Companion ([project link](#))

- Developed a **containerized** backend using modern Python’s **FastAPI** to support an AI-driven application for cross-border traders in East Africa.
- Integrated Generative AI capabilities to provide real-time, context-aware assistance, focusing on high-performance **REST APIs** and robust data management.

Recognition

- Awarded at **Kenya Innovation Week 2024** for climate tech solution (Vambo Ai x Futurize), highlighting experience with impactful, domain-specific technology.
- Served as a mentor at the **Technovation Girls Challenge**, guiding young girls in developing mobile app solutions for real-world problems.
